

Hub & Spigot Pipe and Fittings for the Self-Locking Bi-Seal EPDM Gaskets

Bi-Seal EPDM Gaskets provides a positive compression seal between hub and spigot at three separate points.

They are easy to install will absorb marked deflection after assembly without leaking and will handle both residential and industrial wastes.

Bi-Seal EPDM Gaskets are made to CSA B70 specifications for use with Bibby-Ste-Croix Hub and Spigot Pipe and Fittings.

Bi-Seal Compression Joints – Series 4001

Code	Size	Qty per Box	Weight / Box
