Husky SD 4000 Coupling

The Husky SD 4000 Coupling is a super-duty, all-stainless-steel pipe coupling designed to securely join No-Hub cast iron soil piping. Manufactured with a wider shield (304 Stainless steel) and extra clamps to distribute load and reduce joint movement for extra rigidity.

It features a robust corrugated shield and multiple sealing clamps to ensure a rigid and leak-resistant joint. The high-purity neoprene gasket has a double sealing zone, withstands high liquid temperatures up to 100°C/212°F and does not support flame.
